

National Stone Centre

Health and Safety Statement for Schools

Please sign two forms and return one copy to the National Stone Centre.

Since the National Stone Centre (NSC) opened in 1990, hundreds of thousands of people, including very many children and groups have visited the site and taken part in activities safely. In the interest of the Health and Safety of all the staff, volunteers and visitors, the conditions of use for the groups are as follows.

All visiting group leaders are responsible for the Health and Safety of themselves and the group members in their care and in particular, in respect of the requirements of legislation, to secure Health and Safety and to protect children and vulnerable adults. In this connection they must sign an undertaking acknowledging this responsibility before participating in any activities. (see overleaf)

All visiting group leaders must assure themselves that their competencies and the ratio of leaders to the age, sex and needs of the group members are compliant with statutory requirements and the guidelines of their respective organisation. NSC staff and volunteers should not be included when calculating ratio.

NSC staff and volunteers, tutors and others working for the NSC site are there to provide information and where appropriate, will warn the leaders of hazards and off-limit areas. It is for the visiting leaders to take appropriate action with the students in their care.

All visiting group leaders must make appropriate NSC staff and volunteers fully aware of any special sensory or physical needs or relevant medical issues of the group members in their charge.

All NSC staff and volunteers will be identifiable by a badge with the NSC logo and high visibility clothing.

All visiting group leaders must take account of the sequence and timing of activities advised by the NSC; this is provided in the interest of maintaining safety standards during the day of the visit.

The attention of all visiting group leaders is drawn to the NSC's Risk Assessment guidelines. It is the responsibility of the visiting group leaders to satisfy themselves on all matters and if necessary to seek clarification from the NSC staff and volunteers on any area they do not understand.

The special attention of the group leaders and group members is drawn to the following good safety practice -

Group Leaders and members should:

- a) Only walk forward and never run or walk backwards.
- b) Never throw anything.
- c) Never climb on anything, including rock faces.
- d) Always keep to the paths, routes and places indicated by NSC staff and volunteers.
- e) Be aware that, away from these areas, there may be particularly uneven surfaces, quarry faces and mine workings.

Revised January 2018 (JBC)

- f) Wash hands after activities, especially before eating.
- g) Never drop litter, please use the bins provided.
- h) Never hammer for, or remove, fossils, rocks or minerals.

Parts of the site are rough underfoot; ensure sturdy shoes/trainers are worn. The weather on site can change quickly, it is advisable to bring waterproofs throughout the year; hats/caps are recommended for sunnier weather, warm clothing is recommended at all other times.

The leader of each group (or sub-group, once on site) must appoint one of the teachers/carers to act as 'Tail-end Charlie'. This person will be responsible for keeping the group together.

If the member of staff or volunteer guiding the group deems the groups behaviour to be in conflict with the NSCs Health & Safety requirements, they will terminate the activity if behaviour does not improve after an initial warning to the groups leader (without refund). If conditions on site are deemed to be unsafe (for reasons beyond our control) then the member of staff or volunteer in charge will terminate the activity (without refund).

In addition to the above HEALTH & SAFETY requirements, your attention is drawn to the fact that it is illegal to hammer for, damage or collect rocks, minerals or fossils on this designated Site of Special Scientific Interest (SSSI). In addition many species of plants and animals here are protected too.

NB. These procedures apply, whether or not the group has pre-booked, and for groups undertaking their own activities on the NSC site.
